United States Imports of Merchandise for Consumption

Country of Origin by Subgroup

January 1962

FT 120

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, January, 1962. Washington 25, D. C. April, 1962.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

CHANGE IN BASIC STATISTICAL REPORTING PROCEDURE FOR IMPORTS EFFECTIVE JANUARY 1, 1962

Beginning January 1, 1962, the statistical copies of virtually all formal consumption and warehouse entries are being reviewed by the Customs appraisers of merchandise before they are forwarded to the Bureau of the Census for inclusion in statistics. This review will be made for all consumption and warehouse entry transactions ordinarily subject to examination for Customs appraisement purposes. (It will exclude such shipments as those made by or for the account of the United States Department of Defense, General Services Administration, and the Atomic Energy Commission, since these are not ordinarily subject to Customs examination or appraisement.)

Information on the entries reviewed by the appraiser will be verified and reported for statistical purposes with respect to country of origin and commodity classification (including quantity and value) as required by United States Import Duties Annotated for Statistical Reporting. This verification of statistical data will be made at the time the examiner reviews invoices and samples of merchandise for Customs appraisement purposes. When information at hand is not sufficient to permit complete verification of some of the data on an entry, the Customs examiner will verify or change the reported data on the basis of his experience and the best additional information available. This will enable the appraiser to meet an established deadline for submitting all statistical reports for the month, so as to help safeguard against any appreciable loss in the uniformity of month-to-month coverage.

The procedure for linking the verification of statistical data with the physical examination of merchandise and invoices which the Customs examiner makes for appraisement purposes results in improving the quality of the import statistics. However, for warehouse withdrawals, which constitute about 10 percent of the total value of monthly "imports for consumption," the benefits of the verification procedure will be only of an indirect nature (e.g., through "education" of Customs brokers filing the withdrawals against verified warehouse entries) and improvement in statistical accuracy will, of necessity, be slower than for the over-all. Warehouse withdrawal documents are not routed to the appraiser as part of the regular Customs appraisement procedure. An alternate method is being studied for obtaining corrected reports on withdrawals, based on the corresponding warehouse entries. However, many withdrawals in a current month's statistics are filed against prior years' warehouse entries for which no corrective reports will have been prepared.

Other known problem areas in the verification procedure are being studied and more may be encountered and have to be resolved during the early phases of the program. These will be discussed in subsequent issues of this report as more information about them becomes available. Some experience will be needed, of course, before the full potential of this program can be put to effective use, or the expected results therefrom can be completely realized. However, there can be little doubt that within its framework lies the basis for providing the much needed over-all improvement in the quality of the import statistics.

LOW-VALUED WAREHOUSE ENTRY TRANSACTIONS INCLUDED IN GENERAL IMPORTS STATISTICS ON SAMPLE BASIS, EFFECTIVE JANUARY 1962

Effective with data for January 1962, warehouse entry shipments individually valued less than $100 are being excluded from the detailed commodity statistics on general imports but will be included, together with the sample data for informal and low-valued

formal consumption entry shipments, under arbitrary Schedule A commodity number 9999 5000, with arbitrary Customs district code 99 and subgroup 990, by country of origin. (Commodity statistics for general imports are not available in printed form but are shown in machine tabulations available for public reference.) Preliminary studies have indicated that the volume of low-valued warehouse entry items is quite small, and that the effect of excluding them from commodity statistics will be minor. The low-valued warehouse entry shipments are being included in the general imports statistics on the basis of estimates made from a one percent sample of such shipments, as has been done for formal consumption entry shipments valued less than $100 and for informal entry shipments valued $250 or less.

VALUATION OF RUBBER FOOTWEAR DUTIABLE ON AMERICAN SELLING PRICE

Imports of rubber footwear under tariff paragraph 1530(e) or 1537(b), if determined to be competitive with a like or similar American product, are subject to duty assessment on the basis of the American selling price. In the past, the reported values for transactions dutiable on American selling price may have been the dutiable values in some cases, and foreign values in others. Effective with January 1962, the values on rubber footwear reported by the Customs appraiser for inclusion in statistics will be foreign values whether or not the merchandise is dutiable on American selling price.

It should be noted that the above procedure will not be applicable to other items appraised on the basis of American selling price.

IMPORTS OF URANIUM ORE AND CONCENTRATES EXCLUDED FROM IMPORT STATISTICS 1942 THROUGH 1960

It was announced in the January and August 1961 issues of this report that data on imports of uranium, thorium, and related commodities which were previously withheld for security reasons would be released. With the exception of the following data covering imports of uranium ore and concentrates (Schedule A number 6270 700) these figures will be released later in 1962. Effective with the January 1962 statistics, imports of uranium ores and concentrates, Schedule A number 6270 700, are included on a current basis in the regularly compiled monthly statistics. Monthly totals for 1961 will be corrected to include imports of uranium ores and concentrates during 1961 by means of an errata which will be shown in the March 1962 issue of Report No. FT 110. The following represents imports of uranium ore and concentrates entered under Schedule A number 6270 700 (which is a part of subgroup 630) during the calendar years 1942[1] through 1960. These figures are those furnished by the Atomic Energy Commission since the records on file in the Bureau of the Census are incomplete for that period.[2]

---

[1]The figures shown for 1942 supersede those previously published in Foreign Commerce and Navigation.

[2]See the explanation in the August 1961 issue of FT 110.

It should be noted that the available country information is limited to Canada, Union of South Africa, and all other as "Unidentified Countries"; also, the net quantities and values are in terms of thousands of pounds and thousands of dollars, respectively:

IMPORTS OF URANIUM ORE AND CONCENTRATES BY COUNTRY OF ORIGIN 1942—1960
(Schedule A Number 6270 700)

Year	Value (thousands of dollars)			
	Canada	Union of South Africa	Unidentified countries	Total
1942	674	...	2,951	3,625
1943	154	...	2,124	2,278
1944	1,246	...	2,571	3,817
1945	582	...	2,486	3,068
1946	966	...	9,595	10,561
1947	3,067	...	8,972	12,039

1960	252,360	92,192	19,024	363,576

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

[1]Countries which could not be identified because of illegible reporting on import entries for low-value shipments.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,353,626,440
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		81,004,884
010	Animals, edible (except for breeding)	0010600-0015500	7,192,383
020	Meat products	0018300-0035500	37,404,223
030	Animal oils and fats, edible	0036000-0036900	678,577
040	Dairy products	0037000-0046990	2,910,404
050	Fish and fish products, except shellfish	0047000-0079590	17,147,907
060	Shellfish and products	0080100-0087900	15,038,832
070	Other edible animal products	0088100-0097900	632,558
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		43,516,588
080	Hides and skins, raw (except furs)	0201000-0299900	5,296,078
090	Leather	0301400-0345900	4,566,147
100	Leather, rawhide, and parchment manufactures	0350300-0699990	8,841,313
110	Furs and manufactures	0701000-0759900	16,373,649
121	Animal and fish oils, fats, and greases, inedible	0803000-0821600	398,581
130	Other inedible animals and animal products	0840000-0990350	8,040,820
	GROUP 1—VEGETABLE FOOD PRODUCTS AND BEVERAGES		203,919,424
140	Grains and preparations	1020000-1090260	3,217,028
150	Fodders and feeds, n.e.s	1101000-1190800	1,489,616
161	Vegetables and preparations	1191100-1250900	9,221,207

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

BUREAU OF THE CENSUS

United States Imports of Merchandise for Consumption

Country of Origin by Subgroup

February 1962

FT 120

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, February, 1962. Washington 25, D. C. May, 1962.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORTATIONS OF GOODS FROM CUBA REFLECTED IN THE STATISTICS

The United States Treasury Department Cuban Import Regulations imposes an embargo on the importation into the United States of all goods of Cuban origin and all goods imported from or through Cuba, except as authorized by the Secretary of the Treasury, effective 12:01 a.m., eastern standard time, February 7, 1962.

Although this embargo exists, the import statistics for March 1962 and future months may correctly reflect Cuba as the country of origin of certain imported merchandise. Despite the embargo Cuban merchandise may still be entered into Customs bonded warehouses (and held for reexport) and such warehouse entries will be reflected in the general import statistics. Cuba may also appear as the country of origin in the import for consumption statistics for March 1962 and future months reflecting withdrawals from Customs bonded warehouses for consumption of goods of Cuban origin entered into Customs bonded warehouses before the effective date of the embargo.

In addition some few licenses have been issued by Foreign Assets Control for importations of Cuban merchandise paid for before the effective date of the embargo. These transactions will also be reflected in the future import statistics (either general imports or imports for consumption).

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

U.S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

United States Imports of Merchandise for Consumption

Country of Origin by Subgroup

March 1962

FT 120

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, March, 1962. Washington 25, D. C. May, 1962.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

NEW EDITION OF USIDA TO BE ISSUED EFFECTIVE JULY 1, 1962

A July 1, 1962 edition of USIDA, United States Import Duties Annotated for Statistical Reporting, will be available shortly. This edition is the one referred to in the July 11, 1961 "Notice to Users of Import Trade Statistics." It will reflect the first stage of rate of duty changes made in the 1960-61 GATT negotiations at Geneva which is expected to become effective July 1, 1962. In addition, it will reflect changes aimed at eliminating excessive statistical detail and clarifying certain areas of the reporting requirements. It will also contain a limited number of changes in commodity detail which were requested by users of the import statistics.

Sales copies of the new edition of USIDA are expected to be available, beginning about June 15, 1962, at the Superintendent of Documents, Government Printing Office, Washington 25, D. C., and at local offices of the Collectors of Customs and Department of Commerce Field Offices, at a cost of $4.00 per copy; $1.00 additional for foreign mailing.

Importers and brokers particularly are urged to obtain copies of the publication promptly when it is issued, to apprise themselves of information that will be required to be shown on import entries and withdrawals effective July 1, 1962.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840

17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, April, 1962. Washington 25, D. C. June, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

REQUESTS FOR STATISTICAL DETAIL BEYOND THAT PROVIDED IN THE NEW TARIFF CLASSIFICATION MUST BE MADE BY JULY 16, 1962

The statistical classifications currently used in compiling Data for imports and presented in Schedule A, Statistical Classification of Commodities Imported into the United States, are based on the Tariff classifications contained in the Tariff Act of 1930. With the recent enactment of Public Law 87-456, "Tariff Classification Act of 1962", this foundation is changed, therefore necessitating a revision of the statistical classification structure to align it with the new Act. To provide importers and Customs officers with reporting instructions which integrate statistical requirements with the determination of rates of duty, as is done in the current "United States Import Duties Annotated," it is contemplated that the revised statistical classifications will be put into effect concurrently with the effective date of the new tariff, which is January 1, 1963.

In accordance with Section 201 of the 1962 Tariff Classification Act and Section 484(e) of the Tariff Act of 1930, the Tariff Commission, Bureau of Customs, and Bureau of the Census (with the guidance of the Interagency Advisory Committee on Foreign Trade Statistics) will determine the additional statistical classifications to be provided beyond those already provided in the new structure. In so doing, every effort will be made to carry forward as much of the present statistical detail as possible without violating the principle of eliminating the illogical classes and anomolies of the old structure which is based on the 1930 Tariff Act categories. At the same time consideration will be given to recommendations from users of the statistics for retaining or combining present statistical classes as well as for providing additional statistical detail, all within the framework of the 1962 Tariff Classification Act.

To facilitate the work of revising the statistical classifications, users interested in making recommendations are requested to apprise themselves of the new tariff provisions by referring to the Tariff Commission's report on the Tariff Classification Study, submitted November 15, 1960 to the Ways and Means Committee. Copies of some volumes of the 10-volume report are no longer available, but the second volume, "Proposed Revised Tariff Schedules of the United States," should suffice for this purpose, since it contains all of the proposed revised schedules together with a cross-reference to the existing tariff provisions. This volume can be obtained from the Superintendent of Documents, Government Printing Office, at a price of $4.25 a copy. Arrangements have been made for prompt mailing by having orders placed with the Special Service Section, P. O. Box 1533, Washington 13, D. C.

Recommendations must contain the 5-digit tariff item number shown in the proposed revised schedules, but reference to the present Schedule A commodity number is optional. In order for them to be considered, all requests for additional commodity detail must be in terms of subdivisions that are consistent with the scope of an individual tariff item; as for example, a request to breakout "gasoline" (present Schedule A numbers 5054 600 and 5054 700) from Tariff Item number 475.25, "Motor fuel".

Because of the very tight time schedule which must be observed in order to complete and publish the revised statistical classifications by January 1, 1963, requests from users should be submitted to the Bureau of the Census, Foreign Trade Division as soon as possible, and not later than July 16, 1962. Recommendations already on file will be considered and need not be resubmitted.

CORRECTION OF STATEMENT IN SPECIAL NOTICE IN THE CALENDAR YEAR 1961 FT 110 AND FT 120

In the text of the special notice entitled, "Corrected Monthly Data on Imports of Uranium Ores and Concentrates (Schedule A Commodity Number 6270 700) January-December 1961," which appears in the calendar year 1961 issue of Reports No. FT 110 and FT 120, the presentation of corrected data and information regarding the release of data beginning January 1962 for United States imports of uranium ores and concentrates were inadvertently referred to as export data rather than import data. Users are advised to make this change in their copy of the reports.

REFERENCES TO CUSTOMS EXAMINERS IN THE CALENDAR YEAR 1961 FT 110 AND FT 120 WITHDRAWN

The statement on the cover page and the acknowledgement on the inside of the cover page of the calendar year 1961 issue of Reports No. FT 110 and FT 120 which indicates that the data in the reports were compiled from import entries on which the information used had been verified by Customs examiners is incorrect. Review of import entries by Customs examiners for the verification of statistical information did not begin until January 1962.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,325,644,759
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		77,405,306
010	Animals, edible (except for breeding)	0010600-0015500	9,173,080
020	Meat products	0018300-0035500	33,906,364
030	Animal oils and fats, edible	0036000-0036900	56,193
040	Dairy products	0037000-0046990	2,851,525
050	Fish and fish products, except shellfish	0047000-0079590	17,584,388
060	Shellfish and products	0080100-0087900	13,142,483
070	Other edible animal products	0088100-0097900	691,273
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		39,510,211
080	Hides and skins, raw (except furs)	0201000-0299900	6,035,200
090	Leather	0301400-0345900	4,538,311
100	Leather, rawhide, and parchment manufactures	0350300-0699990	10,392,387
110	Furs and manufactures	0701000-0759900	10,499,525

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, May 1962. Washington 25, D. C. July 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, June 1962, Washington 25, D. C. August 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, July, 1962. Washington 25, D. C. September, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,328,349,963
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		76,551,713
010	Animals, edible (except for breeding)	0010600-0015500	2,205,741
020	Meat products	0018300-0035500	36,511,275
030	Animal oils and fats, edible	0036000-0036900	...
040	Dairy products	0037000-0046990	2,187,479
050	Fish and fish products, except shellfish	0047000-0079590	20,484,972
060	Shellfish and products	0080100-0087900	14,565,428
070	Other edible animal products	0088100-0097900	596,818
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		38,054,108
080	Hides and skins, raw (except furs)	0201000-0299900	4,921,499
090	Leather	0301400-0345900	4,819,130
100	Leather, rawhide, and parchment manufactures	0350300-0699990	13,528,300
110	Furs and manufactures	0701000-0759900	5,616,791

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

Economic Operations Division--M. D. BINGHAM, Chief
IRVING WEISS, Assistant Chief for Processing
SOL DOLLECK, Assistant Chief for Systems Development

Data Processing Systems Division--ROBERT F. DRURY, Chief

Prepared under the supervision of
J. EDWARD ELY, Chief
Foreign Trade Division

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, August, 1962. Washington 25, D. C. October, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

PUBLICATION OF UNITED STATES IMPORT AND EXPORT STATISTICS IN TERMS OF THE 177 THREE-DIGIT SITC (STANDARD INTERNATIONAL TRADE CLASSIFICATION) COMMODITY GROUPS

Effective with the statistics for January 1963, the existing presentation in the monthly and annual issues of Report Nos. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin; FT 120 United States Imports of Merchandise for Consumption, Country of Origin by Subgroup; FT 410, United States Exports of Domestic and Foreign Merchandise, Commodity by Country of Destination; and FT 420, United States Exports of Domestic and Foreign Merchandise, Country of Destination by Subgroup will be changed as follows:

1. Report No. FT 110 Commodity by Country of Origin will be prepared showing the commodity data in terms of the 177 three-digit commodity groupings of the U.N. Standard International Trade Classification (SITC) with a further segregation by the new Tariff Nomenclature recently enacted by Congress. The title of the new nomenclature including the additional statistical breakdowns will be Tariff Schedules of the United States Annotated for statistical purposes, TSUSA.

2. Report No. FT 120 will present data on a Country of Origin by three-digit SITC Commodity Group basis.

3. Report No. FT 410 will be prepared showing data for the 177 three-digit SITC Commodity Groups by the present (1958 as now revised) Schedule B Commodity by Country of Destination.

4. Report No. FT 420 will present data on a Country of Destination by three-digit SITC Commodity Group basis.

In addition, the directly affected reference tabulations (Such as IM 145, IM 153, EM 522, EM 563, etc.) and releases or publications will be modified accordingly.

Along with the publication of the January 1963 data we will provide all recipients of the above publications with an index showing under what three-digit SITC group each detailed commodity number (TSUSA and Schedule B) is located and a table showing what detailed commodities are grouped under each three-digit SITC group. Moreover, in order to provide users of the statistics with data for 1962 on a comparable three-digit SITC Commodity Group basis with 1963 data, a special publication will be transmitted to all recipients of the regular Foreign Trade Import and Export publications, presenting 1962 monthly data in the following arrangements:

1. Imports
   a. Three-digit SITC Commodity Group by Country of Origin
   b. Country of Origin by three-digit SITC Commodity Group

2. Exports
   a. Three-digit SITC Commodity Group by Country of Destination
   b. Country of Destination by three-digit SITC Commodity Group

The special publication presenting 1962 monthly SITC data will be released prior to or at the same time as the January 1963 statistics are released. In addition, monthly reference tabulations for the year 1962 will be prepared for imports on a three-digit SITC Commodity Group by Schedule A Commodity by Country of Origin basis. For annual import data for 1962, it is planned to prepare tabulations on a three-digit SITC Commodity Group by estimated TSUSA by Country of Origin arrangement and Country of Origin by SITC three-digit Commodity Group arrangement.

For exports, reference tabulations presenting monthly and annual data for 1962 will be prepared in terms of three-digit SITC Commodity Group by Schedule B Commodity by Country of Destination arrangement, and Country of Destination by three-digit SITC Commodity Group arrangement. The monthly reference tabulations will be scheduled so that data for any month from 1962 will be available no later than when the data for the comparable month of 1963 are released and if possible all months will be made available by the time the January 1963 data are released or as soon thereafter as feasible.

The preparation of annual data on a three-digit SITC basis for earlier years and the timing as to its availability is under consideration and an announcement will be made in a future issue of this publication.

CERTAIN IMPORT TABULATIONS BY SUMMARY COMMODITY GROUPINGS DISCONTINUED

It was announced in the April-May 1960 issue of Foreign Trade Statistics Notes that machine tabulations presenting data on United States exports and imports by certain summary commodity groupings, i.e., grouped by similarity of physical condition or type, worked out by the Bureau of Foreign Commerce (now Bureau of International Programs), and grouped by "end use", worked out by the Office of Business Economics, cross classified by eight mutually exclusive and thirty selected areas and countries would be prepared starting with the statistics for January 1960. Recently it has been determined that the summary data on United States imports grouped by similarity of physical condition or type and presented in machine tabulations IM 170, IQ 270, and IA 270 are no longer needed by the Bureau of International Programs. Therefore, preparation of these tabulations has been discontinued. The last issues of the tabulations, which were released for public reference, are as follows:

IM 170 - June 1962
IQ 270 - Second quarter 1962
IA 270 - Calendar year 1961

However, preparation of tabulations presenting summary data on United States exports grouped by similarity of physical condition or type and presented in EM 570, EQ 670, and EA 670 will be continued. Also, the preparation of summary data on United States imports and exports grouped by "end use" and presented in machine tabulations IM 171, IQ 271, and IA 271 (for imports) and EM 571, EQ 671, and EA 671 (for exports) will be continued.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,370,728,786

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, September, 1962. Washington 25, D. C. November, 1962.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between

150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample shown immediately to the left of the double asterisk (**) to determine the reliability of the sample, see page x.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, October, 1962. Washington 25, D. C. January, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importe Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, November, 1962. Washington 25, D. C. February, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, December, 1962. Washington 25, D. C. March, 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports in Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as gifts and personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this subgroup is always shown separately and is not subject to the combining procedure which applies to other subgroups when values are less than $10,000. (See Commodity Subgroup Information, below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Subgroups less than $10,000 not shown separately. To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

(c) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments

in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 are included in this report; other announcements on imports are included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

ACKNOWLEDGEMENTS

The statistics in this volume were prepared under the direction of the Foreign Trade, Economic Operations, Data Processing Systems and Administrative Service Divisions. The persons contributing most to this publication are listed below:

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Data Development, Clifton S. Jordan; Operations Liaison, Daniel W. Raaf; Trade Information and Publications, Lala B. Pipkin. Commodities, Victor O. McNabb, Chief; Shirley S. Dungee, Assistant Chief; Commodity Classification: John R. Anglin, Josephine A. Boles, Jeanne M. Boocks, James A. Dailey, Ralph C. Hamilton, Gerald F. Kotwas, Ruth C. Myrick, G. Ross Popkins. Policy and Regulations, Audrey Ratchford, Chief; Coverage and Coordination, Emma Moorman; Regulation, Emerson Jones. Methods and Evaluation, Leonard R. Jackson Chief. Shipping and Foreign Aid Adviser, Milton Kaufman.

Economic Operations Division: Special Assistant, Max Van Horn; Clerical Processing Branch, Wesley R. Grier, Chief; Procedures Branch, Nathan Lesowitz, Chief; Methods Evaluation and Determination Branch, Samuel Schweid, Chief; Electronic Programming Branch, Jack A. Scharff, Chief; Nathaniel Swersky, Assistant Chief; Directory Branch, Manila C. Ramier, Chief; Foreign Trade Section, Lucille P. Morgan, Chief; New York Office, Emily H. Laut, Chief.

Data Processing Systems Division: Rudolph M. Micoly, Assistant Division Chief for Operations; Joseph F. Pewterbaugh, Chief, Machine Tabulation Branch; Vincent H. Greer, Chief, Control Unit; Curtis N. Risley, Foreign Trade Project Planner; Willie A. McMurry, Supervisor, Foreign Trade Punching Group.

Administrative Service Division: Graphics Branch, Robert H. Brooks, Chief; John F. Lanham, Assistant Chief.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, 1962 Annual. Washington 25, D. C. May 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 30 cents.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly and Annual Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

Normally, the amount of the carry-over from month to month (and from year to year) remains substantially constant. For individual commodities, however, the carry-over procedure as a whole may result in the inclusion in the 1962 statistics of some shipments made in 1961, and/or the exclusion from 1962 statistics of some 1962 shipments which will be included in the statistics for 1963.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985.

Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment. (For individual Schedule A commodities, such countries are footnoted in Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin.) At the end of this report, following the statistics for individual countries, the country designation "Unidentified Countries" (arbitrary country code 998 in import tabulations) is shown. This designation is used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments and certain imports of thorium and thorium-bearing materials from countries which, for security reasons, cannot be identified by name. The totals shown under "Unidentified Countries" are excluded from the other country and country by subgroup totals in this report.

(b) Country Definitions - Geographic. The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries.

During 1962, changes in country designations were made as follows:

a. The country designation "Goa,Damao and Diu" was established effective July 1962. During January through June 1962, Goa, Damao and Diu were included under the country designation "Portuguese Asia, n.e.c."

b. The country designation "Portuguese Asia,n.e.c." was deleted effective July 1962. During July-December 1962, the area formerly reported as "Portuguese Asia, n.e.c." was included under the country designations "Goa, Damao, and Diu" and "Southern and Southeastern Asia, n.e.c."

c. The country designation "Southern and Southeastern Asia, n.e.c." included Portuguese Timor during the months of July-December 1962 only. During the months of January-June 1962, Portuguese Timor was included under the country designation "Portuguese Asia, n.e.c."

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal immediate consumption entries and imports (under $250) reported on informal entries. (See discussion below under "Commodity Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under subgroup 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the subgroup 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840

80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The actual value of shipments cannot be less than 1/100 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/100 of the estimate.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,559,689 for the fully compiled data plus an estimate of $397,500 for subgroup 990 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,077,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low-valued shipments for any country indicates that there were no low-valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low-valued imports were not made.

COMMODITY SUBGROUP INFORMATION

(a) Commodity information summarized into subgroups. For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

(b) Low-value shipments excluded from commodity subgroup data. Except for subgroup code 990, "LOW VALUE DOLLAR EST," the commodity subgroups in this report exclude information on imports valued under $100 reported on formal immediate consumption entries and information on imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.) It follows that the import statistics for the individual subgroups (other than subgroup 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual subgroups amounts to about one percent of the monthly import total. The estimates are shown for each country under subgroup code 990, "LOW VALUE DOLLAR EST," in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the subgroup data for individual countries. As of possible further assistance in estimating the effect on individual subgroup data of this handling of small shipments, studies have shown that the undercounting for individual commodity subgroups (totals including all countries) is probably not more than about 5 percent except for the subgroups covering "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus and supplies, n.e.s.;" "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent. It is estimated that the all-country commodity group totals are undercounted by no more than about two percent. The inclusion of the estimated value for low value shipments in Group 9 results in overstating the total value of imports for that group by about 10-15 percent.

The handling of low-valued imports described above has been in effect in the import statistics since January 1958. Descriptions of the special handling of low-valued shipments in effect prior to that date are carried in the then-current publications. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this report and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 4 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 4.
